EDUCATIONAL NOTES

A notable article by Charles Francis Adhms Fr in Harpor's Monthly for November in sometime common school education is a form ble classfor a more assessment of a sometime form of the classform of the class of the classform of the classform of the classform of the class of the classform of the classform of the classform of the class of the classform of th superintendency His method of securing it may not be thought for the present a practical i one but it may be werth while to state it. He would have our colleges position a history that it has not assumed responsibility for these past graduate course with chairs seemed it has not assumed responsibility for these past graduate course with chairs secupi d by professors of pedagogy thus bringing the full force of higher learning to bear on the common chool system. With superintendency organized Lis prefession a class of secomplished efficial or would be created which would stand in the same relation to the school teachers that the staff officer in the same half of the line of staff officer in the army balds to the line of neer We would not pronounce this scheme a til The nacions one but after all, the doubt may be expressed whether deachers can be made by frill has read history a time purpose and history at time purpose. The pressed is posses, are born not made. This is pursued a policy of repressed to lowerds the London Speciator lies this summary of the harmons of a shallful schoolmaster 'To ku will wh divices knowledge may be most effected now how to kindle interest and enthusias at 111 a new study when to appeal to the judgment and when to the mandory, how to put was ques sone how to arrange and corpolate d ffer ent studies and what are their respective val tes as instruments of mental development now to test the results of worst what is the right mode of discipline and how rewards and punishments can be most judiancesly used. Mo chair of pedagogy can give hum matruction. The qualities here stated are those of an original creative and organizing mand. Proper forciting of teach help in many cases towards the result, but will mover make teachers, and after every offort in this direction is exhibited it would doubtless be found that the least banchers were those so found that the least banchers were the general reader naturally desired to know what I was all about. In grang this in know what I was all about. who had practically discarded it. What we way will ever be found to teach with effect the scrence of teaching. It is not a more mechanical employment to be target as the art of mending a kettle, sheeing a horse or making

system. Here we must seree with him. He finds that the present tendency towards educa-tional drill, close grading, praction of move-ment and mechanical restine is a very stress mistake He holds the open on that the more perfectly arganized the system of teaching in the common schools has become, it has in the same ratio become less scientific and less satisfactory in its results. He arrangus our schools at that the whole moving with military precimon to a given destination at a specified cate "Mechanical mathods could not be carried fur-The organization is perfect. The machine works with the premion of clock-work.

It is however company front all the time From one point of view children are regarded as automatous, from another as India rubber bags from a third, as so much is w material.

It is only proper to observe in this connection that our common schools in the rural districts are measurably free from the features which Mr Adams so formbly condemns

The subject of corpora punishment in schools has again been considered in Boston A special committee of the Boston school board has presented a report urging that the tendency of modern mylization is toward the restriction or abolition of corporal punishment and that those teachers who most frequently resort to it are the inexperienced or the incompetent. Their report is followed by an order NORTHERN IDABO AND WASHINGTON prohibiting corporal pushament upon any pupil in primary or high schools and on guls in the grammar schools. When it is inficied on grammar school, howe it must be only by the principal, and that at a section subsequent to the one at which the offense was committed. Reports of every case and to be sent overy month to the socretary of the school conmuttee, and must be upon to mapeuton by the, members of the compacting. But there made distinction which should not be lost night of ment is ofton properand necessary, but we are past the times when it was supposed hat learning could be 'larruped' into children, and that this was the new inche way

A PARELLER OUTRAGE

The outrage perpetrated in the "sheeting " district of Mississippi et of a most flagmant and flagmant kind. It is known, of course, that the district was created in the peculiar shape which gives it its name in order to mass within at the counties having the heavest negro vote Maho is jus so made territory The critical plan was to give no this district to the republicans as it contains about 20,000 republican majority and loave the other districts of the state securely democratic. But Fort Pillow Chalmers, soon conceived the anand by a judicious system of frauds and murdors the purpose succeeded For five years Chalmers has occupied a seat in Congress to which he has not a shadow of nightful claim Chalpers use which he has not a shadow of nightful claim. This time the blacks again appeared at the polls in considerable numbers and the buildozers. There is no great nor violent step from the slaveholder of doctrine to that of the protection. Missessipp provides that the ballots shall have

rists the labor of another, and the second no distinguishing mark of acrice by which authorizes a favored class to appropriate the they may be known when folded. No such carnings of other men. The shareholder took mark or device was on the republican ballots But there was an ordinary printer a dash bed line—speh a dach as any prin neath the need time-species used as any print takes government into parameters the respective at a matter of course—and on the chion of other men's carnings. Except for protonse that this was a distinguishing mark other objects makin features which allowed prewithin the prohibition; several thousand hal lots thrown for Chalmers opposite were rejected and Chalmers was delared ally elected.

Significantly of the United States supplying the content of the Chalmers was delared ally elected. south has been kept solid for the last six land Me to the winter but he emphatically years and it is time to deal with every case of refused to leave Washington. It is probable time to show the authors of these outrages that necessary to appoint four new justices such attempts will be usaless becoafter

The total immigration to this country dur. My John W Forney who deserted the ing, the last fiscal year was 457 157 against 177 publican party because General Grant was not 826 in 1878-9 This is a most setonishing in- nominated at Chicago and plaink gave that as tory of this or any other country. * × 1.2°

The Calbole cent not also restores a disposi-tion to be controversal we had almost each quarrelsome. This week is attacked in an est rie of three columns a vior statement madely. The Orani viav the other day in relation to ulari in the rimail, that the proceedings against the Jounts seem to be sanctioured by the jubic opinion of the country. The On facts nor even approved thems. But THE ORE OCTAN S Stylen: queted above a saya the n bare-facel as ert on without a ful a thing as the Sentinel evidently intended has read history to little purpose who loss not its pursual a policy of topr said towards the Justis that the policy is a feature I the naas to the authority of the church and that the peliev mus some how lave the sanction of maintained under all forms of government which France has employed Here as before stated we are not making ourselves responsible for the facts but only presenting them a d that in no spirit of hosti is whatever t the church which the Sentinel assumes to represent. In all ort we are enter ng into no contro have been taken in Franc for repression of religious orders that of the Jesuits being the most prominent among there and as the telegraph has been dropping many items on the subject the general reader naturally desired to tormation we samply pursued a nowspaper s business, without intention then or now to enter mto any profities toutroversy on the points in dispute between the religious orders and the government

FRUITS OF A DISCOVERY Sir Henris Bessemer, an inventor whose dis-

coverios have done as much to revolutionize a great department of industry as those of any other intentor in any line whatever was born in Japuary 1813 It would not be possible here wen to catalogue his 134 patents All know that his greatest discovery relates to the manufacture of steel It is a very simple thing as simple as that of balancing the egg by Com which we take so much pinds as large adness, the arranges one should not the oction mill and the railroad with the state prison. The chief encential conficer aris in the control of the control of the control of the control of the chief encential conficer aris in the control of the chief encential conficer aris in the control of the chief encential conficer aris in the control of the chief encential conficer aris in the control of the chief encential conficer aris in the control of the chief encential control of the chie prison. The chief executive officer sits in the central office with the time table, which he calls a programme before him. It y which one hour twice a week is allotted to this study, and half an hour three time a week it that and two nivolouses a term to a third, and at auch a time of which cost soll to 160 per ton. And the process will be at this point and the other class that the whole moving with military presents of the first process was as slow and laborators as costive. After the whole moving with military presents of the first process was as slow and laborators as costive at the time of the first process. converted in 28 minutes into 20 tons of steel worth £2000 This year the product of Eng land will be 830 000 tons and of the world 3 000 000 tons Taking the value of a ton of steel to be £50 in 1855 and £10-the English pr co-in 1830, here is a saving that is to say a gift to the world of £120,000,000, or four times the total present value of the product not to coal in the process of manufacture and the fact that many processes and structures are possi-bit which would not have been dreamed of in the age of from No equal result has ever been witnessed from a single duscourry Even the invention of the cotton gin is almost rendered small by comparison. It will pay no longer to build fron railways Stoel rails have now come anto general use and the economy as almost beyoud calculation

Northern Idaho has been for some years very

desirous of being annoxed to Washington terri-tory Projection of the 'pani andle' of Idaho between Montana and Washington to the line of British Commbia is a most arbitrary division of territory There is no communication between north un Idaho and the balance of the members of the designitive. But where no distinction which should no to loss night of ton and Oregon and See pol heal connection for macconduct in school, corporal punish ment is ofton propersing necessary, but we body of Idaho deritory is a most monorement are past the times when it was supposed hat northern country ; contituting th northern counters, constituting the panhan-dio gave voluntary expression to chost desire of annexation to Washington. Only a single vote was cast against the proposition. That one was in Leviston where 276 votes were east if the opposite classifier. All the other poomets so far as heard from were solid for nexation Congress should been this appeal We have no doubt the delegate from Washing ton will do all be can to further it Norther ment proposed would not only be a contribu bon to geographical shapeliness but would be a great convenience to a section which is To adly filling with population and which his nothing in common with the fer ripry to which t is attached
